Perfect design

FIBARO system is designed, developed and produced entirely in Poland. We create all the smart home devices on our own and we take care of even the smallest detail of the project.

Smart home leader

FIBARO is a global brand based on the Internet of Things technology. It provides solutions for building and home automation. FIBARO's headquarters and factory are located in Wysogotowo, 3 miles away from Poznan. The company employs app. 250 employees.

Global reach

In just a few years, FIBARO system has settled on 6 continents, becoming one of the most advanced, wireless smart home systems in the world. Since July 2018 FIBARO brand is a part of the Nice Group.

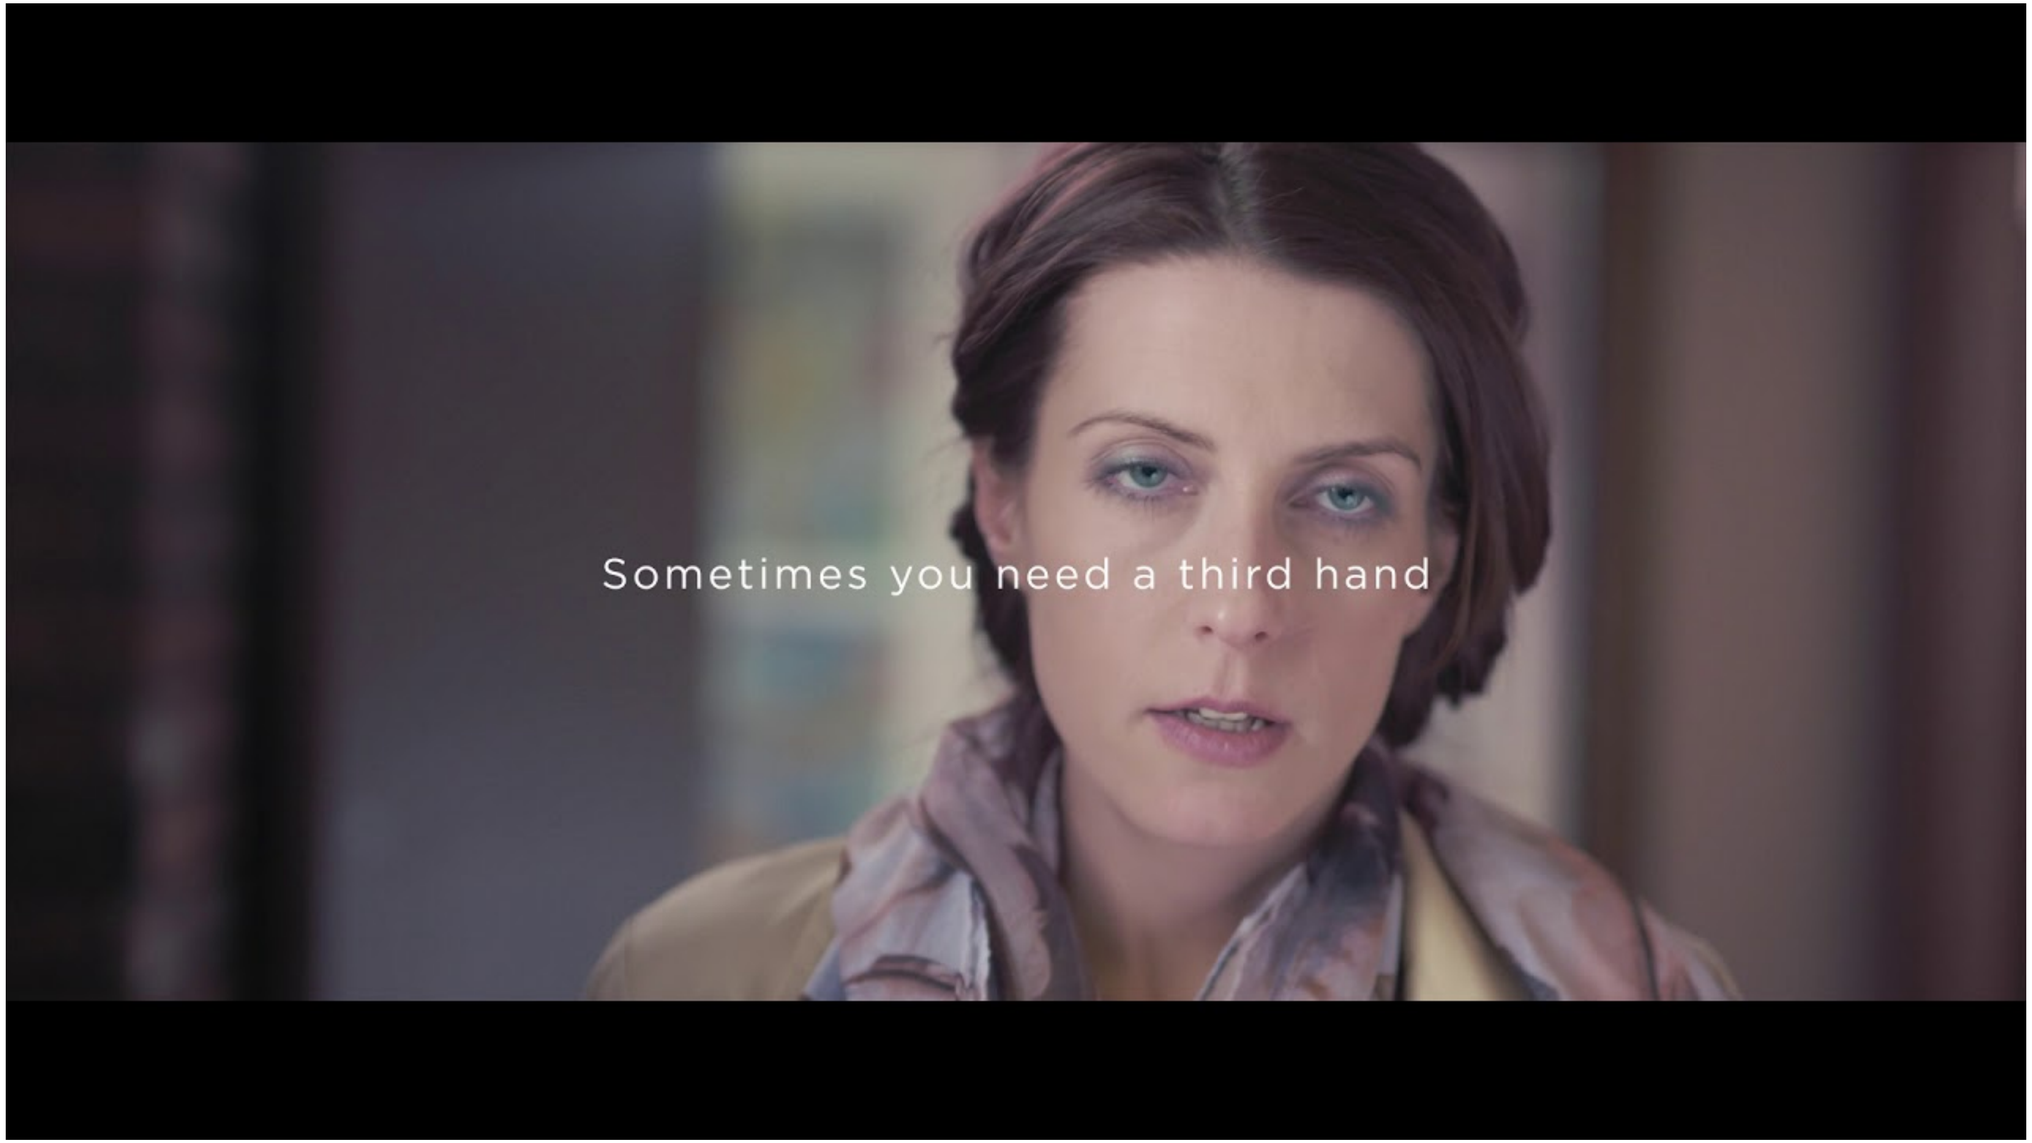
Systems supported

works with the Google Assistant

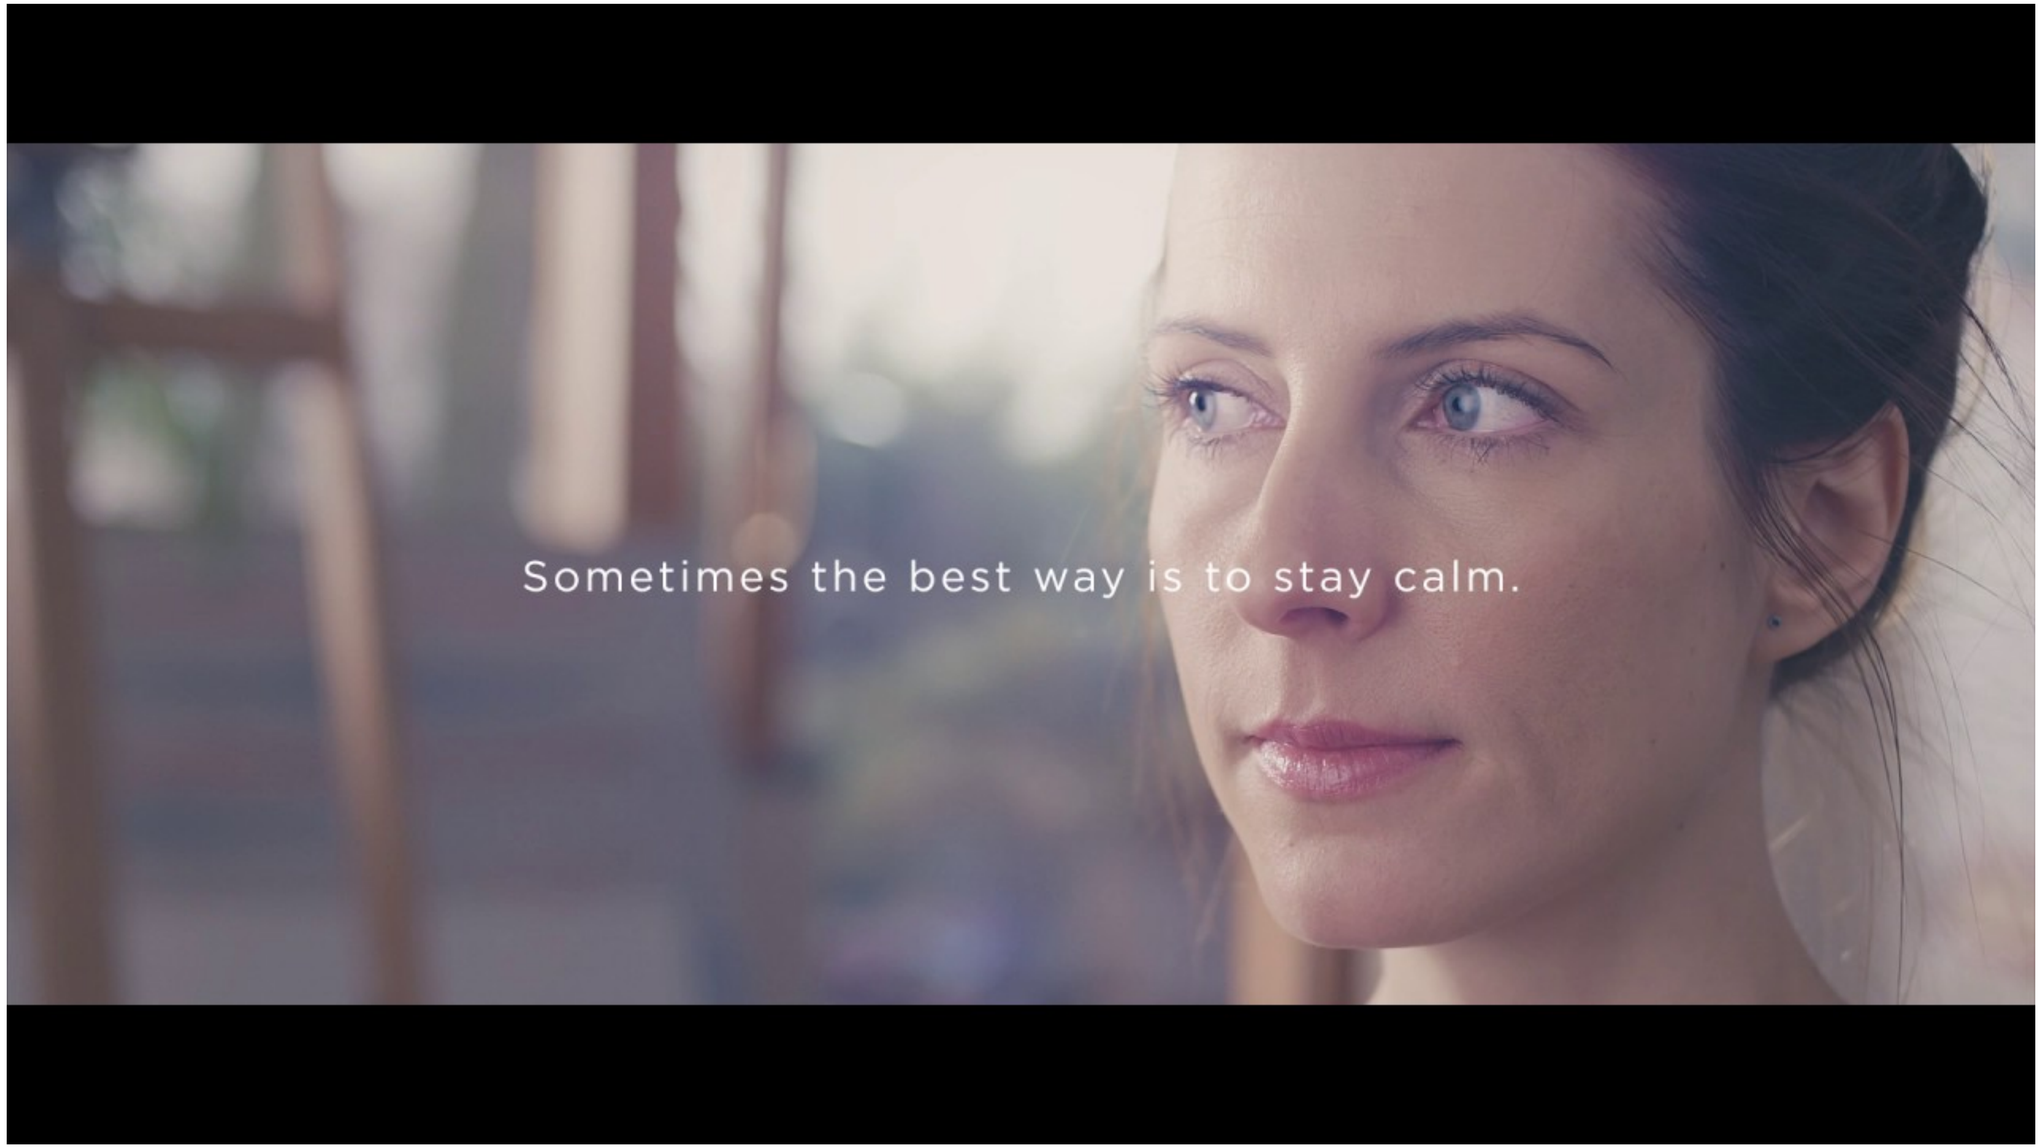
Google Assistant is a voice assistant that supports you in many aspects of your life.

Discover how convenient it is to control your FIBARO system.



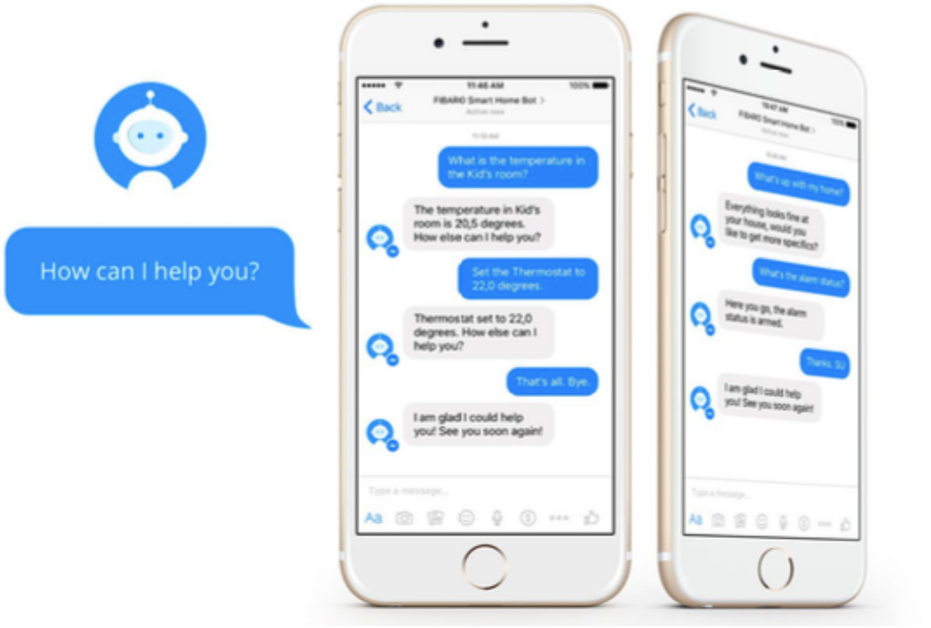
amazon alexa

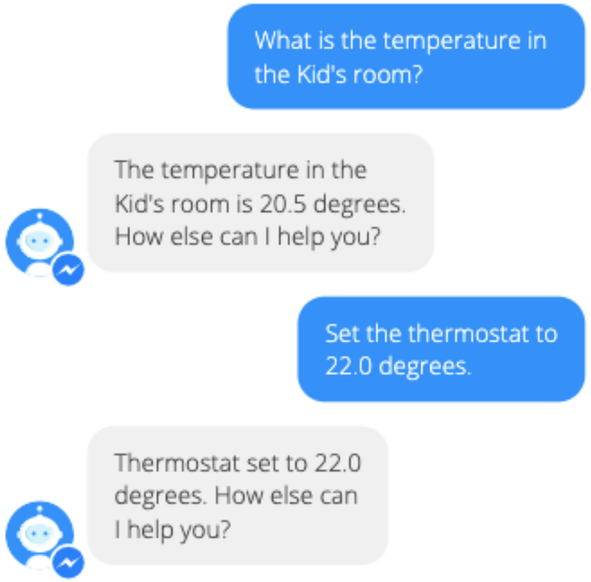
Alexa is Amazon’s cloud-based voice service. Integrate Amazon Alexa with Home Center to control your FIBARO smart home system.

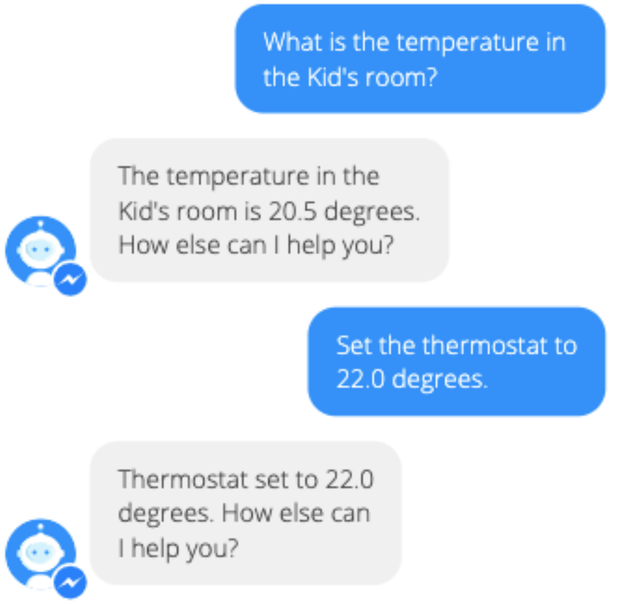


FIBARO Smart Home Bot

A smart FIBARO home can now be controlled via Messenger. The most popular instant messaging app will allow you to manage smart home devices and check what is going on in your house in a quick and convenient way.







Home at your fingertips

Monitoring, setup and management of the smart home system is possible thanks to a simple and functional app available for your PC, tablet, smartphone and even Apple Watch. Get notifications on selected devices, analyze your activity history, and see energy consumption statistics on a screen size that you prefer. Manage FIBARO System as you like whenever you want, wherever you want.

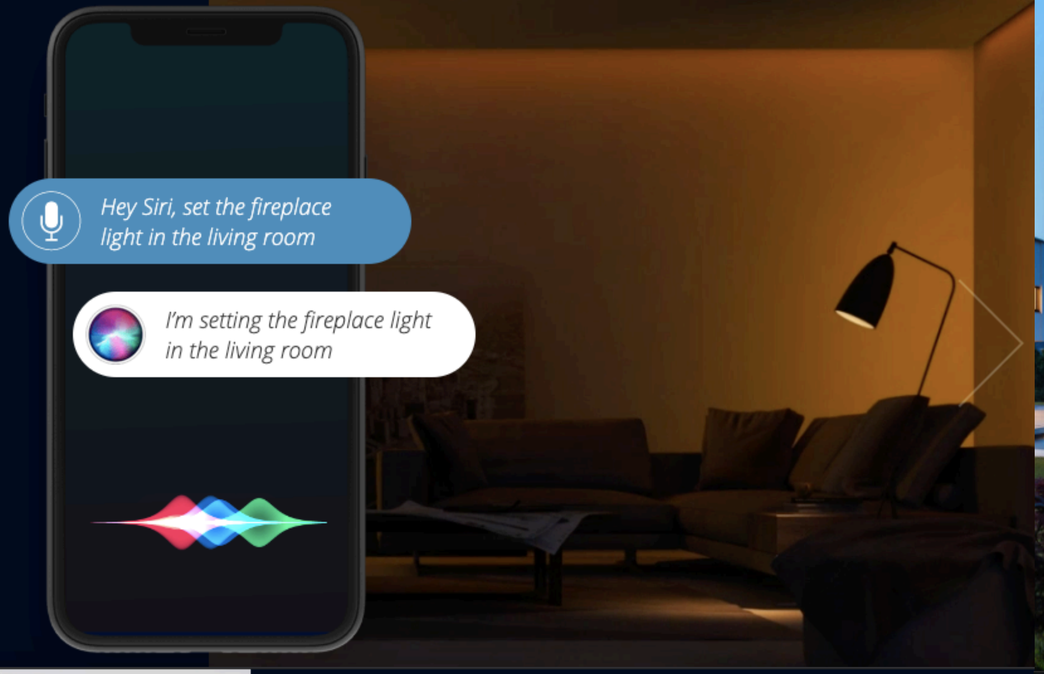
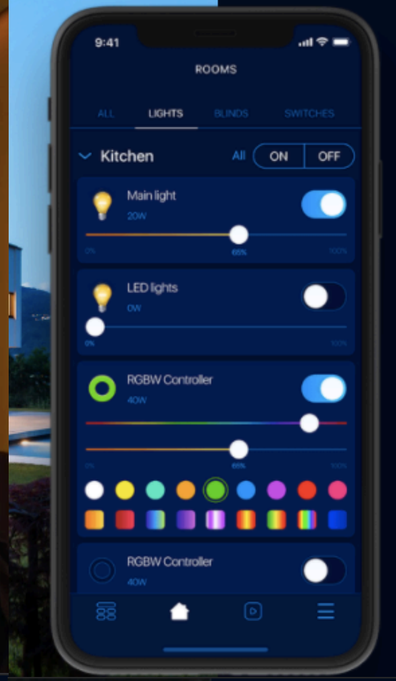
DESKTOP Web App

Smart home controlled with Apple Siri

Control the RGBW strip with voice commands spoken to your iPhone and change your home in no time.



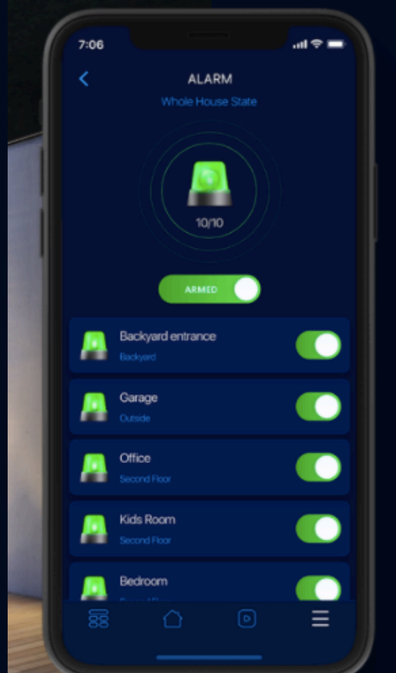


Remote light Management

Turn off the light in the room located at the other end of the house, turn on the light in the living room to simulate someone's presence during a longer trip. If you left the light on and you are already away, turn it off with one simple tap via the mobile app.

Remote roller blinds management

Control the blinds in selected room or the entire house, single or multiple roller blinds at a time without getting up from the couch or while being out of the house.



One click house security

FIBARO Home Center allows not only to close windows remotely and turn off electrical devices but also to arm or disarm the alarm system. Be sure that the house is always secured.
